will progress faster than here, they will learn more rapidly; the intellectual powers will be more expanded.

There is something of this nature that God has revealed. You may think I am now reasoning altogether upon conjecture, and only to be received as such; well, we will let it go as such; but still there are some glimmerings of light and intelligence, which God has revealed in regard to these superior beings in the eternal world, which show us that some such economy will be carried on in the future world. For instance, how does God perceive the thoughts of our hearts? Is there not here a language by which He can discover and discern the thoughts and intents of the heart? Are we not told in many of the revelations how that God can perceive the thoughts of man, and that for every idle thought we are to be brought into judgment? Yes, He discerns the thoughts, and the intents of the hearts of the children of men. Suppose we had some of that power resting upon us, would not that be a different kind of a language from sound, or from a written language? It would. If spirits could commune with spirits, and one higher intelligence commune with another, by the same principle through which God sees the thoughts and intents of the heart, it would be nothing more than what has already existed here in this world, according to that which is revealed.

Much might be said upon this subject; it is a glorious subject to contemplate; and it is that which gives joy to the mind of every righteous man who desires the truth; he knows how happy the principle of truth makes him here, when he discerns it, or it is revealed to him; and if he can get his mind fixed upon a more glorious economy, wherein truth can be unfolded more rapidly, and in such a way that there can be no possibility of mistaking it for error; the very anticipation of it is calculated to inspire the heart of every individual to be faithful in all things, that he may enter into the enjoyment of those blessings which are ahead.

There are a great many things to be contemplated, in connection with man in his future state, compared with his present. One principle I mentioned to you last Sabbath; that mankind would be able, through the power of the Holy Ghost, to obtain a knowledge of a vast number of things at once, and of a vast portion of the works of God all at once, the same as Moses did when he looked upon every particle of this earth and discerned it by the Spirit of God, not only all the various continents and islands, but every particle of the interior of it; all was presented before his mind at once. He did not have to reason out the knowledge concerning these particles; neither did he have to look at one particle of it at a time, but he had the faculty by which he could look at more than one thing at once; he could look almost an infinite number at the same time; for there are more particles in one grain of sand than we could number in all our life if we lived to be a thousand years old; and if Moses could look upon every particle, and behold the whole all at once, he must have had the capacity of looking in all directions in the same moment, and of beholding it by the Spirit. Here was a language by which he conversed with nature; with the works of God; and the Spirit that is in connection with the works of God—that is in all creation—conversed with Moses, for the Spirit of God is in all things, around about all things, through all things, and the law by which all things are governed. When that Spirit, which is thus diffused through all the materials of nature, undertakes to converse with the minds of men, it converses in a different kind of language from that we use in
