Some inquire, “Is this community going to be destroyed by thieves?” No. But they have their agency, and their course affords us an excellent opportunity to see the operation of the benign influences of so-called "civilization." Do you suppose that I am now looking upon thieves? No: they do not come to meeting.

Those who are for right are more than those who are against us. More will prove faithful than will apostatize. A certain class of this people will go into the celestial kingdom, while others cannot enter there, because they cannot abide a celestial law; but they will attain to as good a kingdom as they desire and live for.

Do not worry. All is right, for God reigns. Trust in him, keep your hearts clean, and faithfully observe your prayers, that should the angel Gabriel appear in this stand, you could calmly meet his gaze, and say "All is right with me, Gabriel." That you may be able to look an angel in the eye and say, "All is right," you require a clean heart. How many of this congregation could do this? How many could look at an angel and say, "What is wanting? I am ready." If you can do this, you can enjoy the spirit of the Gospel and be Saints. This is the bread of eternal life.

I bless you all in the name of Jesus Christ. Amen.

EDUCATION—TESTIMONY—MIRACULOUS SIGNS, &C.

REMARKS BY PRESIDENT BRIGHAM YOUNG, MADE IN THE TABERNACLE, GREAT SALT LAKE CITY, APRIL 8, 1860.

REPORTED BY G. D. WATT.

Pertaining to the school that brother Hyde has been mentioning, we shall devote the large building on the east side of Union Square to school purposes. Tuition will be free, and the school will begin tomorrow morning, with Orson Pratt, Jun., and James Cobb, teachers, under the supervision of Orson Pratt, Sen. The Union Academy is designed exclusively for boys and young men. So soon as we have a suitable building, we intend to open an Academy for females, in which they will be taught the common branches of English education, music, and probably some of the modern languages.

We wish those who attend the Union Academy to qualify themselves to be useful to themselves and this community as speedily as possible. We shall urge the study of mathematics, and more particularly their practical application, that as many as have a taste and aptness may become familiar with surveying, which they can fit themselves for in a very short time. There are but few here who are practical surveyors, and we wish that number increased.

One of the teachers will probably attend to the rudiments of education, though we prefer to have scholars tolerably well advanced in arithmetic,
