mountain in the place where this city stood; "and there was a great and terrible destruction in the land southward"—what we term South America.

"But behold, there was a more great and terrible destruction in the land northward"—North America—"for behold the whole face of the land was changed because of the tempest, and the whirlwinds, and the thunderings, and the lightnings, and the exceeding great quakings of the whole earth; And the highways were broken up, and the level roads were spoiled, and many smooth places became rough. And many great and notable cities were sunk, and many were burned, and many were shook till the buildings thereof had fallen to the earth, and the inhabitants thereof were slain, and the places were left desolate. And there were some cities which remained; but the damage thereof was exceedingly great, and there were many in them who were slain. And there were some who were carried away in the whirlwind; and whither they went no man knoweth, save they know that they were carried away. And thus the face of the whole earth became deformed, because of the tempests, and the thunderings, and the lightnings, and the quakings of the earth. And behold, the rocks were rent in twain; they were broken up upon the face of the whole earth, insomuch that they were found in broken fragments, and in seams and in cracks, upon all the face of the land."

You can see from this, what terrible convulsions have taken place on this continent, even here in these mountains. In the mountains west of this valley, you will find the strata of rock set up almost perpendicular; that was not the way they were first formed. You will also find there, as elsewhere, strata dipping at a greater or less angle into the earth. The cause of all this has been the terrible convulsions that our globe has undergone, and more especially at the time of the crucifixion.

"And it came to pass that when the thunderings, and the lightnings, and the storm, and the tempest, and the quakings of the earth did cease—for behold they did last for about the space of three hours; and it was said by some that the time was greater; nevertheless, all these great and terrible things were done in about the space of three hours—and then behold there was darkness upon the face of the land."

I might go on reading, if it were necessary, in regard to the weeping, wailing and mourning of the people during these three days of intense darkness—no sun, moon, nor stars were to be seen, and the vapor was so great that the inhabitants of the land could feel it, the same as the darkness was felt in the land of Egypt. It was not, of course, the darkness that was felt, but the vapor that was so thick. There is one thing, however, to which I wish to call your special attention, before I make any further remarks in regard to the date that is here given. When this darkness dispersed, it is said to have been morning. You will find it on page 454. "And it came to pass that thus did the three days pass away; and it was in the morning, and the darkness dispersed from off the face of land, and the earth did cease to tremble, and the rocks did cease to rend."

You might say that this was not three days and three nights, for Jesus was crucified and died on the cross at 3 o'clock in the afternoon at Jerusalem, and consequently for it to have been just three days and three nights, you might suppose that the darkness must have dispersed in the
