

these men, and we have an account, in the Pearl of Great Price, of the great vision he had concerning this earth. Before the Lord revealed to him the history of its creation Moses beheld every particle of the earth, and the account says there was not a particle that he did not behold, discerning it by the Spirit of God. One of the revelations says, that whatsoever is light is spirit, and there are degrees of this spiritual influence that will affect the natural or mortal eye; then there are other degrees more refined, perhaps, which do not affect the mortal eye, but will affect the immortal eye, yet the Lord would be able to touch the eyes of a man like unto Moses or any other man of God, so as to show him every particle of the earth, inside and outside.

Now, if the mortal man can see this, as Moses certainly did, why should we suppose that we will be limited in that state of immortality which all Latter-day Saints expect to enjoy? It is more probable that we shall be able to discern, not only everything pertaining to this little speck of creation which we now inhabit, but also other worlds and what takes place thereon, as easily as that which takes place on our own. We have revelations also in regard to this. When Enoch was expressing his mind about the greatness of the creations of the Almighty, he said that if a man could number millions of earths like this, and all the separate particles which enter into their composition, it would not be a beginning of those creations, yet, said he to the Lord—"Thou art here, thy bosom is here;" and the Lord said unto Enoch—"I can stretch forth mine hand and hold all the creations that I have made; and mine eye can pierce them also." By what power can

his eye pierce them? By the same power that quickened the eyes of Moses while yet a mortal man; that same power can quicken the eyes of immortality to behold all the creations that the Lord has made, and hence there will be an enlargement of vision in the resurrection.

We might dwell on the enlargement of hearing as well as of vision. Do you suppose that immortal beings depend, for sound, upon the mere vibrations of an atmosphere like ours? This atmosphere only extends about forty-five miles above the surface of the earth. How could beings, away above this atmosphere of ours, communicate sounds to us here? There are other principles and elements of a more refined nature that intervene between these creations that God has made, and these elements may be brought into perfection, and by their vibratory powers they may communicate sounds from one world to another, just the same as light is communicated from world to world, and the immortal ear would be adapted to this.

We have not time to dwell upon this, I merely mention it as one of the great blessings of immortality.

We might mention too, concerning sleep. We have to sleep away about one-third part of our time here; will immortal beings be obliged to do the same, and spend one-third of the eternal millions on millions of the ages to come in dormancy? I do not think any such thing. Inquires one—"Are not things here typical of things hereafter?" Some are not. We die here, but that is not typical of any death that will come on the righteous hereafter, and there are a great many things which we pass through here that are not typical of things hereafter. All physical imperfections will be done away with hereafter, and we shall enjoy a
