

man might tell about certain laws which prevail in heaven, and certain glories which he saw there, but yet, unless the people to whom such things were told had placed themselves in a position to have the Holy Ghost, or the visions of heaven opened to their minds, the words uttered would not be a revelation to them, for it would be altogether beyond their powers to comprehend.

The revelation which Sir Isaac Newton obtained concerning the forces of the universe, has been developed from his day until the present time. The whole learned world of mathematicians have brought all their faculties and powers to bear upon this one little law which I have expressed to you, and have they got through with it? Oh no, it is just beginning to unfold to them some of the common phenomena of the universe, and that is about all. In about a century hence, if the Lord should spare the world, and men make as much advance in these matters as they have done in the century past, this law, there is no doubt, will be carried out into a great many channels and branches that we know nothing about now. Says one—"If it requires so much study on the part of the learned world to unfold and comprehend this one law, it is discouraging to think that there are perhaps hundreds of other laws as intricate as this to investigate before it is possible to come to an understanding of them." We need not be discouraged upon this subject; for if we do the best we can according to the position in which we are placed, and the opportunities which we have, we do all that the Lord requires; and by and by we shall be placed in a condition in which we can learn much faster than we can now. We need not be discouraged. Perhaps the man who,

under a sense of discouragement, gives up and does not make the best of his present limited opportunities, will be limited hereafter in the life to come, and will not be allowed to progress very fast, because of his laziness and his want of desire, courage and fortitude to pursue certain channels of knowledge that were opened up to him here in this life. But when we see individuals not only willing to receive some few of the simple principles of the Gospel of Christ, but are willing to press onward towards perfection as far as opportunities present themselves, we may rest satisfied that they will be honored of the Lord according to their diligence, perseverance, fortitude and patience in striving to understand the laws which he has given to all things.

We might, if we had time, point out a great many other laws. The law of light, for instance, and the law of the velocity of light, or the manner in which light is permitted to go from world to world, and in touching upon these and similar subjects we should be describing to you the power, wisdom, greatness and majesty of the Creator, who has constructed all these things according to law, and all of them are governed by his laws. It would seem almost impossible to untutored minds, if we were to tell them that a motion could be transferred from world to world at the rate of one hundred and eighty-five thousand miles every second of time. Wonderful. We almost start back at the declaration, and almost doubt the possibility of the velocity thus indicated. But incredible as it may seem to the uneducated, it is a certain thing; it does not rest upon the imaginations of the children of men; it is just as certain that light travels at nearly that rate from one creation to an-
