

selecting an unwise law, varying from the one which now obtains among gravitating materials.

The law of velocity must be exactly adapted to the law of the inverse square of the attractive power. Who was it that made this adaptation? Did the materials endow themselves with both of these laws? Did they perceive that no other laws would render the universe stable or lasting? Or, otherwise, is there an all-wise and all-powerful Governor who brings all things under the dominion of laws, wise in their action, powerful in their nature, and preserving the grand machinery of the universe, in the most perfect harmony in the working of all its parts?

There must, then, have been some great supreme intelligence who organized these worlds and gave them laws of attractive force and adjusted velocities and thus produced the harmonious orbits which we have, and which will preserve themselves, unless interfered with by some extraneous force, for thousands of years to come.

We might go on and speak of a great many other principles connected with these laws, but let us now come to the laws given to intelligent beings. God has given laws to what might be termed intelligent nature; but let me say, that what is termed intelligent nature is sometimes called in this same revelation from which I have been reading, a spirit, or rather, a power that "is in all things, through all things, round about all things, and the law by which all things are governed." It is, then, an intelligent power that encircles itself through, or over, or round about every particle or every atom, and these atoms act in accordance with the law that is ordained, and do not deviate from it unless

commanded by the same authority that gave the law. The same Being, who gave the law to materials by which they act, can counteract the law. He did so in the instance when Elisha caused iron to swim. We read, that as one was felling a beam, the axe head fell into the water. The man, was much concerned, because it was a borrowed axe. "And the man of God said, Where fell it? And he showed him the place. And he cut down a stick and cast it in thither; and the iron did swim." Now what was it that caused the axe to rise in the water? The same Being who gave the law of gravitation, which caused the axe to sink, counteracted that law, and caused the axe to swim. The same Being who gave the law of universal gravitation, can counteract this law. He did it, in many instances, in ancient times. He divided the Red Sea to allow the Israelites to pass. The water stood up like walls, in a great heap, not for a few seconds, or minutes, but stood there sufficiently long to allow the Israelites to get to the other side of the sea. Now, what was it that counteracted this law of nature? What was it that caused this watery element, which has a tendency to spread out and sink to its own level, to stand up in a heap, almost like a solid body? The same Being who gave the law, which governs the yielding liquid properties of water, can counteract the law, so as to make the water stand in heaps. God is the great Author of all law, and is just as able to counteract a law, as he is to continue a law. Let him withdraw the command that materials shall attract all other materials; let him say to matter, "I no longer require you to act according to that law," and you would not find the earth going in an orbit around the sun.
