to say," says one, "that the materials of that temple will not wear?" "Do you mean to say," some of you may inquire in your hearts, "that age will have no effect upon the walls and the materials of that temple?" This is what I mean—I mean to say that not only the Temple, but all the buildings that shall be built round about that Temple, and the city that will be built about it, which will be called the New Jerusalem, will be built of materials that never will decay. "But," says one, "that will be contrary to the laws of nature." You may cite me to some of the buildings that existed before Christ that were built out of the most durable materials that could be found, and yet when the storms of hail, rain and snow came, these buildings began to waste away until they could scarcely be recognized. Well, I do not ask you to think that this temple and the city round about it will defy the rough hand of time and the work of the elements of our globe, and exist forever, so far as natural laws are concerned; but there is a principle higher than these natural laws. Did you never think of it—a higher principle, a higher kingdom that governs all these laws of nature, such as you and I have been accustomed to understand ever since our youth. I say there is a higher law, a controlling power over all the laws of nature, that will prevent these buildings from decaying; and I wish while dwelling upon this subject to say a little about another subject; that is, the building up of Palestine with the new Jerusalem. It will be the old Jerusalem rebuilt upon its former site. Now, will that city ever be destroyed, will it ever decay? Will the Temple to be built in Palestine ever be thrown down or ever be furrowed with hail, rain, snow and frost—will these ever have any effect upon it? No, not in the least.

Why? Because God will be there. So He will be in the temple of Zion on this continent, and by His power, by His laws—which are superior to all those grosser laws of nature—He will preserve both of these cities, one on the western hemisphere, and one on the eastern hemisphere, from any decay whatever. Now, we have it recorded here in this book, in the 31st chapter of Jeremiah, that this city on the eastern continent shall not be thrown down any more forever. It seems, therefore, to be an eternal city, never to be destroyed. "But," says one, "I cannot believe that; I cannot believe but what these cities will be subject, just as much as anything else to decay." Do you believe this good book—the Bible? If you do, you are obliged to believe that such things are possible. Do you want to know some of them? I will mention one instance. You will recollect that Moses commanded Aaron to take a pot of manna and lay it before the Lord, to be kept for their generations. Now it was a noted fact that if the children of Israel gathered more manna than would last them until after the next morning, it would decay; but on the last day before the Sabbath they gathered manna for two days, and they found that on the Sabbath day it was preserved. Who preserved it? Why did it last two days instead of one? Because God counteracted those lesser laws, or laws of nature, by His divine power, which is greater than them all, and He therefore preserved for two days that which would not last longer on the other days of the week than twenty-four hours. Well, we find that the Lord ordered the manna to be placed in the tabernacle to
